Introduction . . . . .	5
Rules of behavior in the physical laboratory . . . . .	6
Introduction to error theory . . . . .	8
Laboratory work No 1. Precise weighing . . . . .	15
Laboratory work No 2. Study of electrical properties biological tissues . . . . .	29
Laboratory work No 3. Liquid viscosity coefficient determination . . . . .	38
Laboratory work No 4. Measurement of arterial blood pressure by Korotkov's method . . . . .	52
Laboratory work No 5. Reversible pendulum . . . . .	57
Laboratory work No 6. Determination of the ratio $C_P/C_V$ , and sound speed in the air by means of acoustic resonance . . . . .	67
Laboratory work No 7. Determination of the ear audibility area by means of threshold method . . . . .	82
Laboratory work No 8. Determination of specific heat capacity and specific latent heat vaporization of water, check the heat balance equation . . . . .	90
Laboratory work No 9. Measuring specific resistance of a thin wire . . . . .	101

Laboratory work No 10. Study of the heart bioelectrical with the help of ECG recorder . . . . .	107
Laboratory work No 11. Study of the biological microscope and methods of measuring small objects . . . . .	114
Laboratory work No 12. Determination of sugar concentration with the help of saccharimeter . . . . .	130
Laboratory work No 13. Determination of the refractive index of liquids by refractometer . . . . .	140
Laboratory work No 14. Photoelectric method for determining the concentration of solutions . . . . .	151
Laboratory work No 15. Study of properties of laser radiation and light diffraction . . . . .	159
Laboratory work No 16. Study of thermal effect from high frequency therapy . . . . .	172
Bibliography . . . . .	186
Appendix A. Tables . . . . .	187
